<u>DISORDERS</u>	<u>RESULT</u>	<u>REMARKS</u>	<u>REFERENCE VALUE</u>
CAH		Outside Normal Limits*	
17 Hydroxyprogesterone (CAH)	152.18		<55 nmol/L

The reference values are calculated for newborns. Please correlate clinically

Instructions:

*CONGENITAL ADRENAL HYPERPLASIA (CAH):

SIGNIFICANTLY ELEVATED.

SIGNIFICANTLY ELEVATED. This could be secondary to low birth weight/prematurity. Congenital Adrenal Hyperplasia cannot be excluded. IMMEDIATE investigation is needed: electrolytes (Na & K), RBS or CBG and serum 17-hydroxyprogesterone are recommended. Consultation with a Pediatric Endocrinologist is strongly advised.
